

**Post-Doctoral Opportunity at the Northwestern
University Prosthetics-Orthotics Center**

The Northwestern University Feinberg School of Medicine has a Post-Doctoral Researcher position available (2-3 years) within the Northwestern University Prosthetics-Orthotics Center (NUPOC) in the area of prosthetics and rehabilitation of persons with limb loss. The Researcher will be supervised by Matthew Major, PhD, and responsible for coordinating and contributing to the activities of several projects supported by the US Department of Defense and in collaboration with other institutions. Projects include studies on the mechanical characterization of prosthetic devices, locomotor stability and postural control of persons with limb loss, and interdisciplinary therapeutic interventions for rehabilitation. Highly motivated candidates with a strong background in engineering, biomechanics, and/or human movement sciences are encouraged to apply. Experience with gait analysis and mechanical/materials testing a plus, but not required. Please direct inquiries to Matthew Major at matthew-major@northwestern.edu or 312-503-5731.

Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes, including veterans and individuals with disabilities. Women, racial and ethnic minorities, individuals with disabilities, and veterans are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.
