

**Have you experienced upper limb loss or congenital limb difference?**

**Are you at least 18 years old?**

**Are you interested in participating in a research study?**

At the Jesse Brown VA Medical Center Motion Analysis Research Laboratory, we are seeking individuals who are 18 years old and above to participate in a study on walking, standing, and balance of people who have experienced upper limb loss.

In order to participate, we are looking for individuals who:

- ✓ Are an **upper limb amputee**
- ✓ Are able to **walk independently** without a walking aid
- ✓ Are able to walk comfortably for up to 10 meters (or 33 feet) and stand quietly for up to 40 seconds

You will be asked to make one visit to the Motion Analysis Laboratory to perform some simple walking and standing tasks.

The visit will last between 2 and 3 hours and you will be compensated for your time.

If you are interested and would like to learn more about this study, please contact:
